

## PROJECT MEXICO

Energy America demonstrated its continued commitment to Mexico in the development, construction and operation management of two solar PV plants for a fund managed internally. One of the PV plants, which is located in Mexico, and has the capacity of 15.6 MW with 66,080 modules. The other plant is located in Sonora, which has a production capacity of 6.8 MW and consists of 28,320 modules.

This project was important for the creation of jobs in Mexico. The construction of the two solar plants involved a total of 200 workers - In addition, the continuing operation and maintenance (O&M) services will be provided by EA and will employ more than 10 people.

Will displace 34,000 metric tons of CO<sub>2</sub> equivalent emissions per year

**Owner:**

National utility

**EPC Contractors:**

Energy America Inc

**Type:**

GROUND MOUNT

**Number of Modules:**

94,400

**Project Size**

22.4MW (AC)

**Homes Powered**

5,000

**Tons CO<sub>2</sub> Displaced Annually:**

34,000 tons
