

## PROJECT CALIFORNIA

Energy America completes a utility-scale Solar PV plant in California with a total capacity of 28.1 MW, EA undertook the Development of this 28.1 MW solar PV plant cluster, from the Greenfield development to construction, connection and operation & maintenance.

As a testament to the superb engineering skills and experience of EA, the construction of the cluster was completed in 15 weeks. With an installed capacity between 4.4 and 6.63 MW, with phase installation, simultaneously in California to date

**Owner:**

PPL Energy

**EPC Contractors:**

Energy America Inc

**Type:**

GROUND MOUNT-FIXED

**Project Size**

28.1MW (AC)

**Homes Powered**

18,000

**Tons CO<sub>2</sub> Displaced Annually:**

14,900 tons
